Epigenetic Modifications Associated with Temperature Stresses

Message from the Guest Editor

Epigenetics refers to the heritable alterations in gene expression that may lead to a variation in the phenotype without a change in the DNA sequence. Molecular events in epigenetics take place naturally in cells but are also affected by environmental conditions, such as heat, cold, drought, and pathogen infections. In particular, heat and cold greatly affect plant growth and development. Research in recent years has revealed that epigenetic modification plays a key role in plants' response to temperature stress. This Special Issue focuses on recent progress in the epigenetic control of temperature responses, including cold and heat responses in plants. Further research perspectives will also be discussed. We invite you to submit an original scientific report, a review article, or a commentary or perspective piece on this topic.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
