

Special Issue

Ecology and Conservation of Squirrels

Message from the Guest Editor

Squirrels constitute the members of the family Sciuridae, of the order Rodentia, with 285 species, constituted within 58 genera, squirrels are one of the most diverse mammals. Overall squirrels can be categorised into three groups, viz., tree squirrels, flying squirrels, and ground squirrels, which differ distinctly from each other in ecology and morphology. Against this background, the goal of this Research Topic is to compile, from a wide range of contexts and geographies, an interdisciplinary system of knowledge conducive to the understanding the regional and global conservation priorities for this family, including, but not limited to, knowledge related to the diversity, distribution, ecology, evolution and adaptation strategies employed by various members of this ubiquitous family. The goal of the special edition is to offer a publishing venue for those wishing to publish on Sciuridae and make their work easily accessible to a wide readership.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
