

Special Issue

Skin Biology and Pathology

Message from the Guest Editors

The Special Issue “Skin Biology and Pathology” explores the latest advances in understanding skin structure, function, and disease mechanisms. It covers topics such as epidermal barrier formation, immune responses in dermatological disorders, molecular pathways in wound healing, and the role of stem cells in skin regeneration. For this Special Issue, we invite original research and review articles addressing various aspects of skin biology.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.
