

## Special Issue

# Immunology and Immunotherapy in Cardiovascular Disease

### Message from the Guest Editors

Cardiovascular disease remains the leading cause of mortality and morbidity. The critical involvement of both innate and adaptive immune systems in cardiovascular inflammatory responses is being recognized and the therapies targeting various immune cells are being proposed for the treatment of cardiovascular diseases including atherosclerosis, myocardial infarction, and stroke. Therefore, we are pleased to launch this Special Issue on the topic of “Immunology and Immunotherapy in Cardiovascular Disease”. This Special Issue will include original research articles, high-quality meta-analysis, and state-of-the-art reviews discussing recent advances in the field. We welcome both fundamental and clinical research. If you are interested in contributing to this issue, please feel free to contact us prior to your submission of a full manuscript.

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
