

Special Issue

Biosynthesis of Metabolites from Microorganisms, or Microorganism-Host Interaction? (Volume II)

Message from the Guest Editors

Microbial metabolites are compounds that microorganisms use to complete their own life activities. They include primary metabolites such as amino acids, lipids, and organic acids, and secondary metabolites such as antibiotics. Different microorganisms produce different metabolites, resulting in diverse structures of metabolites that are widely used in medicine and industry. The biosynthesis of metabolites also provides new ideas and breakthroughs for research in the life sciences. For this Special Issue, research on the regulation mechanism of metabolite biosynthesis and analyses of the metabolite biosynthesis process are welcome for submission. Moreover, submissions of research on the biological activity of metabolites are also welcome.

Guest Editors

Dr. Fengli Zhang
Prof. Dr. Zhiqiang Liu
Prof. Dr. Michel Denis

Deadline for manuscript submissions

1 September 2026

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
