

Special Issue

The 1st International Online Conference on *Biology*—“Across Levels of Biological Organization” (*Biology* 2026)

Message from the Guest Editor

From 10 to 12 February 2026, we will hold the First Online Conference of the *Biology* journal

(<https://sciforum.net/event/IOCBI2026>). We have named the conference “Across Levels of the Biological Organization”. We intend for it to showcase fundamental research in biological evolution, ecology, conservation biology, marine biology, zoology, and plant science.

Taking advantage of this conference, we propose publishing the results presented here in a Special Issue of the journal *Biology*. However, we are aware that the conference has time limitations, so we also invite other researchers who have not presented their work at the conference to also contribute to this Special Issue. The key topics we have in mind for this Special Issue are biological complexity, climate change, global biodiversity, host-parasite interactions, and plant adaptations. We plan to open submissions throughout 2026, once the conference has ended in February. Submitted papers will follow the usual review procedure of the journal *Biology*.

Guest Editor

Prof. Dr. Andrés Moya

About the Journal

Message from the Editor-in-Chief

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
