Special Issue

Experimental Biology 100 Years After the Foundation of the Italian Society: A Celebratory Special Issue

Message from the Guest Editors

The Italian Society of Experimental Biology was established in Pavia, Italy, in 1925 by the "Gotha" of famous Italian physicians and researchers.

With this Special Issue, we want to celebrate one of the most important and popular scientific societies in Italy (and probably in the world) by publishing both original papers and reviews produced by researchers worldwide on the topics of experimental biology, such as anatomy, histology, embryology, physiology, biochemistry, cell biology, genetics, pharmacology, anthropology, cancerology, pathology, microbiology, etc. The fields of research also include advanced microscopy and imaging, aging, aquatic environments, artificial intelligence applied to biomedicine, biodiversity and modeling, biology of reproduction and infertility, biomedical and pharmaceutical biotechnology, cellular stress, environment and health, micro- and nanovesicles in biomedicine, neuroscience, nutrition and food supplements, plant biology, precision medicine, regenerative medicine, structural biology, urban biodiversity and climate change, and other arguments related to the emerging concept of "one health".

Guest Editors

Prof. Dr. Francesco Cappello

Department of Experimental Biomedicine and Clinical Neuroscience, University of Palermo, via del Vespro 129, 90127 Palermo, Italy

Dr. Maria Grazia Palmerini

Department of Life, Health and Environmental Sciences, University of L'Aquila, 67100 L'Aquila, Italy

Deadline for manuscript submissions

31 December 2025

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
