Natural Products in Modern Biology: Ancient Wisdom for Today's Challenges

Message from the Guest Editors

The use and exploitation of natural products (NPs) is anchored throughout the history of mankind. Today, the modern tools of biology (bioinformatics, proteomics, genomics, metagenomics, structural biology, and analytical technologies) allow scientists to understand the biological effects of natural compounds on cells, organisms, and the human body. NPs have evolved their function over millions of years making them often more efficient than synthetic substances if a specific biological activity is needed. This Special Issue welcomes the submission of original research, short communications, and review manuscripts focusing on the biological effects of natural products, especially in therapy approaches (not restricted to humans), but also on the specific technologies employed in their identification and targeting, helping us to provide a realistic overview of this very exciting and interdisciplinary field of biological research.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
