Neural Correlates of Perception in Noise in the Auditory System

Message from the Guest Editor

Humans and animals constantly face challenging acoustic environments such as various background noises that impair the detection, discrimination, and identification of behaviorally relevant sounds. Dissecting how auditory neurons discriminate communication sounds in noise is a major goal in auditory neuroscience. This Special Issue of *Biology* entitled “Neural Correlates of Perception in Noise in the Auditory System” will integrate the human and animal literature aiming to understand the mechanisms operating during perception of communication sounds in noise. This Special Issue aims to collect reviews and original articles on recent investigations of neural correlates of perception in noise either with humans or with various animal models. Theoretical contributions and modeling studies are also welcome if they are directly related to the perception of communication sounds in noise.

Guest Editor

Dr. Jean Marc Edeline

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
