

# Special Issue

## Research on Primate Endocrinology

### Message from the Guest Editor

It is with great pleasure that we introduce the Special Issue “Research on Primate Endocrinology”. In the past decades, endocrine studies focusing on nonhuman primates have helped us understand the evolution of primate societies, behavioral ecology, reproductive fitness and physiology. Considering the important role of hormones as mediators of primate behavior and physiology, this Special Issue aims to advance our knowledge on endocrine techniques and their applications to studies on human evolution, conservation and welfare. We call for original research papers that investigate the relationship between hormones and development, behavior, reproduction, stress, energetics and senescence in nonhuman primates. Innovative approaches and novel methods to measure hormones, neurotransmitters and proteins are of particular interest. Dr. Martine Meunier

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
