Ventral Hippocampus: Features of Functional Organization

Message from the Guest Editor

Research during the last few decades has revealed a wide repertoire of functions in which the ventral hippocampus is profoundly involved, including social memory, anxiety, context-dependent fear, and decision making. Furthermore, the ventral hippocampus is preferentially involved in depression, schizophrenia, epilepsy, and autism. Comparisons between the two extreme segments of the hippocampus, i.e., the ventral and dorsal, have revealed notable features of an intrinsic ventral hippocampus circuit, including increased excitability, narrower range of activity-dependent synaptic plasticity, and relatively high levels of several neuromodulators. Therefore, elucidating the details of this organization will gradually contribute to the understanding of how this organization supports ventral hippocampus-dependent functions. Furthermore, revealing the mechanisms underlying the specific roles that the ventral hippocampus plays in neurological, psychiatric, and neurodevelopmental disorders will advance our ability to design new therapeutic strategies for the treatment of disorders involving the ventral hippocampus.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
