

Special Issue

The Emerging Role of Mitochondria in Neurobiology

Message from the Guest Editors

Mitochondria, often recognised as the powerhouse of the cell, have increasingly been identified as crucial players in neurobiological processes. This Special Issue aims to gather cutting-edge research that elucidates the multifaceted roles of mitochondria in neural function, development, and disease. We invite contributions investigating mitochondrial dynamics, bioenergetics, and their regulatory mechanisms within the nervous system. Submissions exploring how mitochondrial dysfunction contributes to neurodegenerative diseases (e.g., AD, PD, and ALS) are particularly welcome. Additionally, we seek studies on mitochondrial involvement in neural plasticity, synaptic function, and neurogenesis. This Special Issue will provide a comprehensive overview of the current state of mitochondrial research in neurobiology, highlighting novel discoveries and technological advancements. We encourage the submission of original research articles, reviews, and methodological papers that contribute to a deeper understanding of mitochondrial roles in the realm of neural health and disease.

Guest Editors

Dr. Filipe V. Duarte

Center for Neuroscience and Cell Biology (CNC), University of Coimbra (UC), Coimbra, Portugal

Dr. Cláudia Deus

Multidisciplinary Institute of Ageing (MIA-Portugal), University of Coimbra, Coimbra, Portugal

Deadline for manuscript submissions

31 March 2026

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
