Special Issue

Aquatic Alien Invasions and Their Impact on Biodiversity and Ecosystem Services

Message from the Guest Editors

Alien species and especially invasive alien species (IAS) are collectively among the major drivers of change that can negatively affect biodiversity, ecosystem functions and services, and human health. Aquatic ecosystems suffer greatly from such invasions, with alien species being transported from one water body to another though a wide variety of pathways. Moreover, invasions of the aquatic realms are difficult to reverse, as eradication can be rarely conducted, especially in marine ecosystems or wider and complex inland water bodies. Even though biological invasions have been monitored and recorded, their impacts on biodiversity and ecosystem services have not been thoroughly addressed. The aim of the present Special Issue is to compile state-of-the art work that documents IAS impacts and provide tools for understanding, evaluating, and mitigating their effects on biota and aquatic services.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
