From Molecules to Morphology: A Focus on the Effects of Reproductive Hazards on Mammalian Reproduction

Message from the Guest Editor

Reproductive health and fertility preservation are facing the detrimental effects of increasing environmental, lifestyle or occupational exposure to reproductive hazards, such as, for example, agricultural chemicals, smoke, alcohol, drugs, food additives, contaminants from plastics, industrial waste disposal, radiation, excessive vibration or heat. Reproductive organs are sensitive targets of pollutants, but their unique role in developing germ cells and growing embryos leads to a different vulnerability among mammals due to species-specific adaptive capacities. This Special Issue is open to original research papers and reviews on in vivo, ex vivo, and in vitro models highlighting toxicant-induced injuries to the mammalian reproductive system and related pregnancy outcomes, with a focus on the molecular, biochemical, physiological, and morphological effects exerted by chemical and physical agents on fertility.

Guest Editor

Dr. Maria Grazia Palmerini

Department of Life, Health and Environmental Sciences, University of L'Aquila, 67100 L'Aquila, Italy

Deadline for manuscript submissions

closed (30 November 2021)

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
