Inertial Sensor Assessment of Human Movement

Message from the Guest Editors

The development of low-cost, commercial MEMS inertial sensors has led to rapid growth in research on the application of these sensors for the assessment of daily human movement, sport and exercise. The incorporation of inertial sensors in smartphones and, more recently, in smartwatches has not only driven research, but it has also broadened their application to detecting a wide range of human movements; for example, they are used in occupational, clinical and rehabilitation settings; movement variability; postural and motor control; and movement entrainment to rhythmic acoustic stimuli. This Special Issue welcomes original research and review papers covering inertial sensing of the full span of human movement.

Guest Editors

Dr. Elissavet Rousanoglou

Dr. John Buckley

Dr. Alan Godfrey

About the Journal

Message from the Editor-in-Chief

Biomechanics (ISSN 2673-7078) is an international, peer-reviewed, and open access journal devoted to the fast publication of the latest achievements of scientific research in the area of biomechanics. Both experimental and theoretical papers are published. We hope that the submission guidelines and submission template will assist you in your submission of your research to this journal, and that you will enjoy reading the articles in *Biomechanics*.

Editor-in-Chief

Prof. Dr. Tibor Hortobágyi

1. Research Professor, Department of Kinesiology, Hungarian University of Sports Science, 1123 Budapest, Hungary
2. Research Professor, Institute of Sport Sciences and Physical Education, Faculty of Sciences, University of Pécs, 7624 Pécs, Hungary
3. Professor Emeritus of Movement and Healthy Ageing, Department of Human Movement Sciences, University Medical Center Groningen, 9700 Groningen, The Netherlands

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 7.7 days (median values for papers published in this journal in the first half of 2025).
