Message from the Guest Editor

Dear Colleagues,

This Special Issue will offer an up-to-date and comprehensive overview of the state of the art of endocrinology and metabolism in Italy. Given the long-term tradition of fundamental science in Italy, it is our aim that articles in this Special Issue cover basic, translational, and clinical aspects of endocrine diseases. The Special Issue will provide comprehensive insight into recent advancements in diabetes, endocrine diseases, obesity, neuroendocrinology, immunometabolism, as well as disorders associated with growth, reproduction and hormone-regulated gene expression.

Original research contributions and reviews in the field are welcome for submission.
