submissions:

closed (15 November 2023)

Message from the Guest Editor

Dear Colleagues,

Sepsis remains associated with a significant morbidity and mortality. The importance of organ injury was recognized in this process and is now included in the diagnostic criteria for sepsis in the most recent sepsis conference (Sepsis-3 conference), replacing the concept of sepsis as mere “systemic inflammatory diseases”. Thus, it is critical to understand the mechanism of organ injury in sepsis, thereby developing approaches to attenuate it. This Special Issue focuses on studies deciphering the mechanism and modulation of organ injury in sepsis, hoping to lead to the improvement of outcome of sepsis.

Dr. Waldemar Kanczkowski

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
