

## Molecular Detection of Infectious Diseases

Guest Editors:

**Dr. David J. Speicher**

Assistant Professor, Biology &  
Health Sciences, Redeemer  
University, Hamilton, ON, Canada

**Dr. Marjoree Sehu**

MBBS, FRACP (Gen Med,  
Infectious Diseases), FRCPA  
(Microbiology), AFRACMA Head of  
Infectious Diseases and Infection  
Prevention, Peninsula Health,  
Melbourne, Australia

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Dear Colleagues,

An accurate and early diagnosis is essential for a good prognosis for infectious diseases and to facilitate their optimal treatment. The field of molecular diagnostics is rapidly changing with the emergence of new technologies and/or improved methods ranging from sample extraction to amplification to provide an economical, quicker, more sensitive, and/or more accurate detection of infectious agents. These improvements are shaping the future of diagnostics from point-of-care testing to the clinical laboratory. This Special Issue of *Biomedicines* provides a venue for publishing research and review articles that focus on the application of new or modified methods to detect viruses, bacteria, fungi and parasites. The scope of this Special Issue includes the evaluation of a new diagnostic kit, the identification and/or validation of a new biomarker, the modification of an existing method for a new application, and the establishment of a new diagnostic algorithm.

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
