2. Health Research Institute of the Hospital Clínico San Carlos (IdISSC), 28040 Madrid, Spain

Dr. Rosa De Hoz

1. Ramon Castroviejo Institute of Ophthalmologic Research, Complutense University of Madrid, 28040 Madrid, Spain
2. Health Research Institute of the Hospital Clínico San Carlos (IdISSC), 28040 Madrid, Spain
3. Department of Immunology, Ophthalmology and ENT, Faculty of Optics and Optometry, Complutense University of Madrid, 28037 Madrid, Spain

Deadline for manuscript submissions:

closed (25 June 2025)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is the second volume of “Neurodegenerative Diseases: Recent Advances and Future Perspectives”.

Neurodegenerative disorders impact a significant portion of the global population, and their prevalence is increasing in tandem with rising life expectancies. Conditions such as Alzheimer’s disease (AD), Parkinson’s disease (PD), Huntington’s disease, amyotrophic lateral sclerosis (ALS), frontotemporal dementia, ataxias, and glaucoma are characterized by progressive neuronal deterioration and the disruption of neural connectivity, leading to impairment in mobility, coordination, strength, sensation, cognition, and vision.

This Special Issue, under the direction of Dr. López-Cuenca and Dr. De Hoz, will highlight recent advances in the fields of basic, translational, and clinical research in neurodegenerative diseases. It aims at expanding knowledge on the pathophysiological mechanisms and therapeutic pathways for these disabling diseases.

Dr. Inés López-Cuenca

Dr. Rosa De Hoz

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
