Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editors

The impact of vitamin supplementation on health and disease has a long tradition. Despite the fact that the role of vitamins is relatively well described, there are still many topical questions, the answer to which would enable the resolution of many important issues related to the need for supplementation or increasing their supply depending on gender, age, season, or health condition. Additionally, due to the development of research methods, more new literature data are indicating the possibility of their different activities depending on their baseline concentrations in the body or the presence of disease. Due to the conflicting data appearing in the literature, the issue still remains relevant and is additionally gaining importance during the ongoing COVID-19 epidemic.

For this issue, we invite the submission of articles that may contribute to a better understanding of the effects of all types of vitamins on the human body, both in health as well as in disease. These submissions can be based on studies of physiological function and regulation mechanism of vitamins, or subjected to therapeutic treatments, taking into account the modern methodology used in biomedical sciences.

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
