### Message from the Guest Editor

Dear Colleagues,

This Special Issue is the second volume of our previous Special Issue “Multiple Sclerosis: Diagnosis and Treatment”. We cordially invite authors and investigators within this complex field of universal interest to submit original research or review articles pertaining to this Special Issue. Studies and opinions on risk factors related to the development of the disease, molecular aspects of its pathogenesis, diagnostic intricacies despite current criteria, and the status of disease-modifying therapies’ effects in relapsing and progressive forms of MS, and what is foreseen on the horizon are welcome.

Prof. Víctor M. Rivera
