### Message from the Guest Editors

In this Special Issue, we will focus on new statistical and computational methods for omics data analysis and integration in complex diseases, new software and bioinformatics pipelines to analyze omics data and applications in biomarker discovery, disease classification, patient stratification, drug repurposing and drug discovery. Validation experiments are required.

**Keywords:** Omics Data Analysis; Omics data integration; Biomarker Discovery; Disease Classification; Precision Medicine; Machine Learning; Bioinformatics; Biostatistics

Deadline for manuscript  
submissions:

**closed (31 May 2022)**

USA

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
