

## Special Issue

# Recent Advances in Liver Cirrhosis

### Message from the Guest Editor

Liver cirrhosis is a progressive and dynamic chronic liver disease. It is widely prevalent worldwide and can be caused by different causes, such as chronic viral hepatitis, alcohol-associated liver disease, metabolic-associated fatty liver disease/nonalcoholic fatty liver disease (MAFLD/NAFLD) and so on. The major complications of cirrhosis include varices, ascites, hepatic encephalopathy (HE), hepatopulmonary hypertension, hepatocellular carcinoma, hepatorenal syndrome, spontaneous bacterial peritonitis, and coagulation disorders. The pathogenesis of cirrhosis and its complications is very complex; this is because early diagnosis is often difficult, and the disease usually goes unnoticed for a long time. Therefore, we are excited to inform you of our Special Edition titled “Recent Advances in Liver Cirrhosis” for the journal *Biomedicines*. We welcome submissions with a focus on the disease burden, pathophysiology, early diagnosis, and monitoring of cirrhosis, and the novelty therapeutic strategies of its complications.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
