Treatment of HIV Infection: Strategies, New Drugs and Drug Metabolism

Message from the Guest Editor

HIV is one of the most important infectious diseases due to its clinical and sociological implications, as patients still face stigma, and its wide diffusion, despite long-standing awareness and prevention campaigns. Research has made many advancements to improve not only treatment effectiveness but also patient quality of life. Nowadays, therapies are based on single-tablet regimens, reducing the pill burden. Additionally, there is also the revolutionary possibility of resorting to long-acting injection therapy, administered every two months. In fact, this could guarantee patients greater freedom around therapy, avoiding taking daily drugs, which could further translate, for some, into logistical and sometimes psychological advantages. This Special Issue aims to analyze the effect of this type of regimen on patients in terms of efficacy and metabolism.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
