

## Special Issue

# Emerging Trends in Reproductive Endocrinology and Pregnancy-Related Disorders

### Message from the Guest Editor

Pregnancy-related disorders, such as preeclampsia, eclampsia, gestational diabetes, and the complex management of multiple pregnancies, continue to pose significant risks to maternal and neonatal health worldwide. This Special Issue aims to highlight the pressing need for advanced research in the field of reproductive endocrinology and obstetric pathophysiology. Emphasis is placed on the development and integration of innovative diagnostic and therapeutic strategies to enhance early detection and personalized management of these conditions. State-of-the-art molecular and imaging technologies are rapidly transforming the clinical landscape, offering promising avenues for improved outcomes.

We welcome submissions from reproductive endocrinologists, maternal-fetal medicine specialists, molecular biologists and geneticists, pharmacologists, and researchers working in related fields to contribute their original research articles and reviews. We also encourage interdisciplinary collaborations that bridge basic science and clinical applications in pregnancy-related disorders and reproductive endocrinology.

### Guest Editor

Dr. Theodoros Kalampokas

Assisted Reproduction Unit, Second Department of Obstetrics and Gynecology, Aretaieion University Hospital, Medical School, National and Kapodistrian University of Athens, 76, Vasilisis Sofias Avenue, 11528 Athens, Greece

### Deadline for manuscript submissions

31 March 2026

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
