

## Special Issue

# Advances in Therapeutic Strategies and Precision Medicine in Solid Tumors and Metastasis

### Message from the Guest Editors

This Special Issue of *Biomedicines* is dedicated to the most novel therapeutic strategies for the treatment of solid tumors. Understanding molecular cancer pathogenesis has allowed scientists to develop increasingly effective treatment strategies. For some tumors, the use of personalized medicine throughout treatment with monoclonal antibodies, immunotherapy, and epigenetic drugs has already become a reality. In the future, the main objective will be to extend the possible molecular targets to make even tumors with a high incidence of metastasis and mortality more approachable with individualized anticancer therapies. With this ambitious goal, we aim to collect in this Special Issue original research articles and reviews highlighting recent breakthroughs in personalized medicine and novel hypothetical targetable molecular mechanisms in the field of cancer. We welcome contributions assessing topics with robust molecular rationale in precision molecular therapy, nanodrug and molecule delivery, non-coding RNA-based therapeutics, as well as novel biomarkers useful in early diagnosis and prognosis.

### Guest Editors

Dr. Silvia Di Agostino

Oncogenomic and Epigenetic Unit, Istituto di Ricovero e Cura a Carattere Scientifico (IRCCS), Regina Elena National Cancer Institute, 00144 Rome, Italy

Dr. Giulia Fontemaggi

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
