

Special Issue

Renin-Angiotensin System in Cardiovascular Biology

Message from the Guest Editors

The aim of this Special Issue is to present the latest updates on the role of the renin-angiotensin system (RAS) in cardiovascular biology, from cellular mechanisms to organ functions and novel therapeutic mechanisms. The RAS has an important role in the regulation of blood pressure and salt water homeostasis. Angiotensin II (AngII) is the main regulator. Therapies based on angiotensin-converting enzyme (ACE) inhibitors (ACEIs) and blockers of AT1 angiotensin receptors have been effectively used in the therapy of hypertension for decades. Other RAS pathways have more recently become the focus of research, including ACE2 and AT2 receptor signaling, as well as the conversion of AngII to Ang 1-7. Alternative activation of these pathways may also propose novel additional molecular mechanisms and beneficial therapeutic potential in cardiovascular pathology. This Special Issue therefore invites original research papers and review articles providing the latest insights into the complexity of the cell signaling and biological mechanisms of the RAS components to propose novel mechanisms in cardiovascular physiology and pathophysiology.

Guest Editors

Dr. Mária Szekeres
Dr. György L. Nádasy
Dr. András Balla

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
