Molecular and Clinical Aspects of Endometriosis Pathophysiology

Message from the Guest Editors

Endometriosis is a disease that affects the quality of life and fertility of up to 10% of women worldwide. It is a heterogeneous, estrogen-dependent inflammatory disease that is characterized by the growth of endometrial-like lesions outside of the uterus and is associated with chronic cyclic pain and reduced fertility. Resolving open questions in the pathophysiology of endometriosis may guide better diagnosis and treatment of the disease. Hence, we are pleased to invite submissions of original research articles and reviews on the topic of our Special Issue entitled “Molecular and Clinical Aspects of Endometriosis Pathophysiology”. We look forward to receiving your contributions that address the pathology of endometriosis and relate findings to the potential for improving clinical practice.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA

2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
