Pathogenesis and Treatment of Diabetic Cardiomyopathy

Message from the Guest Editor

Diabetic cardiomyopathy refers to cardiac alterations induced by the diabetic milieu. Although these injuries are independent of the vascular damages associated with diabetes, they frequently coexist, leading to adverse cardiovascular abnormalities that are considered as the major causes of death in this population. Due to the complexity of this disease, the underlying mechanisms of action has not been fully unveiled yet, making it difficult to discover efficient treatment pathways for patients. Hence, research on the potential activated pathways of the diabetic heart and on the impact of new anti-hyperglycemic/lipidemic drugs on the myocardium is encouraged to develop new therapeutic strategies. **Keywords:** diabetic cardiomyopathy; molecular mechanisms; risk factors; diagnosis; therapy

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
