Special Issue

New Advances in Chronic Kidney Diseases

Message from the Guest Editor

The prevalence of Chronic Kidney Diseases (CKDs) is still a growing concern worldwide, representing a major public health issue. Understanding the multifaceted pathogenesis of CKD as well as the early detection and the development of novel therapies are key components for expanding our knowledge on CKD. Serum and urinary extracellular vesicles can be a convenient tool for detecting biomarkers of disease progression. This Special Issue will focus on the advances in CKD research. We encourage researchers to share their latest discoveries on CKD: from biomarkers that could facilitate the early detection of CKD, to gaps in the understanding of the pathophysiology, and finally, pharmacological and/or molecular therapies against CKD. We hope this Special Issue will contribute to better addressing the current challenges in research and clinical practices on CKD.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access iournal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

- Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
- 2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
