

Special Issue

Pathology of the Vagina: Insights from Molecular Perspectives

Message from the Guest Editor

This Special Issue focuses on the pathology of the vagina at the molecular, cellular and tissue levels, specifically exploring the molecular perspectives and techniques used to investigate and explain its role in pelvic floor disorders (PFDs). The aim is to enhance our understanding of the underlying mechanisms and pathophysiology of PFDs, leading to improved treatment options and/or preventative strategies. This Special Issue serves as a platform for researchers and clinicians to share their latest discoveries and advancements on the molecular aspects of vaginal pathology to shed light on the specific molecular pathways involved in pelvic floor disorders. It is anticipated that the collective knowledge shared through this Special Issue will contribute to the ongoing efforts to improve the diagnosis, management, and overall understanding of PFDs. We invite researchers to submit their original research, reviews, and perspectives to contribute to this important and timely Special Issue on the pathology of the vagina from molecular perspectives.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
