Recent Developments in Mycobacterial Research

Message from the Guest Editor

This Special Issue invites cutting-edge research findings and reviews on the following:

- Recent advances in the understanding of the host immune responses against tuberculosis infection;
- The pathogenesis of tuberculosis;
- Novel therapies for tuberculosis;
- The prevention of tuberculosis;
- Novel diagnosis for tuberculosis;
- COVID-related disruptions in managing tuberculosis.

We look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.
