Advancements in Research on Pancreatic Cancer: From Biomarkers to Targeted Therapies

Message from the Guest Editor

This Special Issue will consider original research articles, reviews, communications, and well-documented opinions and perspectives which contribute to advancing knowledge of this deadly, difficult-to-detect, and incurable cancer. Our objective is to provide the scientific community with insights that will help to enhance progress in the fight against pancreatic cancer. We look forward to receiving the contributions of international colleagues working in this field.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.
