Recent Advances in Craniofacial Pain and Headaches—Second Edition

Message from the Guest Editors

Pain is the most prevalent symptom of all and accounts for up to 80% of visits to health care facilities through the emergency department. From this perspective, the field of pain should be one of the greatest challenges for health care providers. Among the different types of pain, craniofacial pain and headaches have proven to be highly disabling and involve significant health care costs. In recent decades, our approach to both pain assessment and treatment has undergone significant changes and advances. The development of new neurophysiological models that aim to explain how pain works and how it impacts an individual from a biopsychosocial point of view has been key to these advances. Specifically, this Special Issue aims to bring together new research in the field of craniofacial pain and headaches. We welcome original articles and reviews focused on the molecular and cellular mechanisms of craniofacial pain and headaches.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
