Natural Product for the Interventions of Chronic Diseases: From Source to Therapy

Message from the Guest Editor

This Special Issue, titled "Natural Product for the Interventions of Chronic Diseases: From Source to Therapy", will focus on the discovery, analysis, and application of natural compounds in the prevention and treatment of chronic diseases. Submissions should highlight advancements in the selective extraction and refinement of bioactive components, the evaluation of their therapeutic potential, and the exploration of the molecular mechanisms through which these compounds exert their effects. We welcome studies that employ state-of-the-art techniques for the identification and enhancement of the therapeutic properties of natural products, as well as research that offers insight into the pharmacodynamics and pharmacokinetics of these potential treatments. By integrating traditional understanding with modern scientific approaches, this Special Issue aims to further the development of natural products as efficacious agents in the long-term management of chronic diseases. This Special Issue only includes research "with defined molecular compound".

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
