## Feature Reviews in Adipokines

### Message from the Guest Editor

This Special Issue, “Feature Reviews in Adipokines”, will cover a selection of up-to-date review articles related to adipokines. Adipokines are a steadily growing group of bioactive peptides and proteins with important roles in metabolism and numerous diseases. The adipokine repertoire differs between white, beige, and brown adipocytes, and the regulatory mechanisms are still not fully known. Abdominal obesity carries a higher risk of getting sick than peripheral adiposity, and in recent years the understanding of the responsible pathomechanisms has increased. Visceral fat released adipokines correlate with systemic inflammation providing a link between abdominal obesity and metabolic dysfunction. Circulating levels of adipokines have emerged as promising biomarkers in various diseases. Adipokine receptor antagonists and agonists may become drugs for the treatment of different diseases. This Special Issue welcomes all up-to-date review articles that address recent research on adipokines.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
