The Role of Polyamines in Human Health and Disease

Message from the Guest Editor

There has been an accumulation of knowledge by many researchers on polyamines. Polyamines are essential for the survival and function of all living organisms. In recent years, polyamines have been reported to be associated with healthy longevity and various areas of disease that have not been previously examined. Unfortunately, however, some of these studies have been conducted without fully understanding the properties of polyamines that have been accumulated to date. Furthermore, because of this, the effects of polyamine degradation products have been erroneously reported as the direct effects of polyamines. Therefore, in this Special Issue, we would like to accumulate new findings on polyamines for healthy longevity and polyamines and diseases, based on a full understanding of conventional findings and the characteristics of polyamines. We invite papers on polyamines and health, including basic research, clinical studies, and even epidemiological studies.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
