

## Special Issue

# Molecular Mechanisms and Novel Therapies for Chronic Inflammatory Skin Diseases

### Message from the Guest Editors

Recent major research advantages have led to notable advancements in the knowledge of the pathogenesis of inflammatory chronic skin diseases such as psoriasis, hidradenitis suppurativa, atopic dermatitis, and chronic urticaria. This has resulted in the development of new targeted therapies (biologic drugs, biosimilars, and small molecules), which have completely transformed the management of chronic inflammatory skin diseases. The aim of this Special Issue is to collect high-value papers reporting interesting and novel data about molecular mechanisms behind chronic inflammatory skin diseases, as well as recent findings regarding currently available and future treatments, including data about experiences from real-life settings.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
