Diabetes and Cancers

Message from the Guest Editor

Although diabetes has been traditionally associated with cardiovascular risk, a growing body of evidence shows that this disorder leads to an increased risk of cancer. The scope of this Special Issue is to analyze the association between diabetes and cancer from an epidemiological point of view, to unravel the molecular mechanisms involved, and to describe the clinical and therapeutic implications.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.
