Druggability of Proteins in Oncology Targeting Immune Cell Signaling

Message from the Guest Editor

This Special Issue on “Druggability of Proteins in Oncology Targeting Immune Cell Signaling” will mainly focus on known and novel druggable proteins and their potential to induce a potent antitumor immunity for cancer immunotherapy. Proteins important for an effective antitumor immune response have been extensively studied in the past two decades and have been shown to induce great response rates in some cancer patients. Still, new pathways/proteins, combinatorial approaches, and methods to target druggable proteins are envisioned as a way forward to extend the benefits of clinical immuno-oncology therapies to a larger number of cancer patients. We cordially invite authors in the field to submit original research or review articles pertaining to this important and fast-progressing field of biomedicine.

Guest Editor

Dr. Victoria Klepsch

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
