

## Special Issue

# Non-antiviral Agents for Treatment of COVID-19 2.0

### Message from the Guest Editor

The novel coronavirus disease (COVID-19) continues to affect millions around the world, with no end in sight. A significant number of patients with COVID-19 who experienced exacerbated symptoms have died. Thus, saving the lives of patients with severe COVID-19 is currently of the highest importance. While antiviral agents, including those currently under development, are effective in the early phase of the disease, they are not effective in the late and advanced phases of COVID-19. Alternative approaches are required for these cases, including modulators for cytokines, inflammation inhibitors, and protective agents for tissue injury. This Special Issue aims to publish original research papers and/or relevant reviews of the most recent literature on the beneficial effects of non-antiviral agents for the treatment of moderate-to-severe COVID-19.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
