

Special Issue

Diagnosis and Treatment of Periodontal Disease

Message from the Guest Editor

Over recent decades, extensive basic science and clinical research have underscored the critical link between periodontal health and systemic well-being. Despite this, periodontal diseases remain a global epidemic and a significant challenge for dental professionals. Contributions addressing epidemiological perspectives and community periodontal health are also welcomed, given the widespread prevalence of these conditions. We welcome submissions of original research and review articles for the upcoming Special Issue on topics including, but not limited to, the following:

- The application of digital technologies and artificial intelligence in clinical and imaging diagnostics, as well as treatment planning;
- The effectiveness of advanced clinical techniques for diagnosis, treatment strategies, and monitoring treatment outcomes;
- Molecular and cellular biological studies related to periodontal diseases;
- The association between systemic health and periodontal diseases;
- Maintenance therapy approaches, including plaque control and oral hygiene control.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
