New Insights in Hematologic Malignancies: From Pathophysiologic Mechanisms to Therapeutic Strategies

Message from the Guest Editor

This Special Issue will focus on the pathogenesis, diagnosis, prognosis, and treatment of hematologic malignancies, including but not limited to leukemia, lymphoma, and myeloma. Hematologic malignancies are a diverse group of disorders arising from the abnormal proliferation and differentiation of hematopoietic cells, often driven by complex genetic, epigenetic, and microenvironmental factors. While targeted therapies and immunotherapies have improved outcomes for some patients, resistance and relapse continue to pose major challenges, emphasizing the urgency of uncovering fundamental disease mechanisms and identifying new therapeutic targets. Overall, this Special Issue aims to bring together recent insights into the biological and clinical management of hematologic malignancies, fostering interdisciplinary collaboration and facilitating translational advancements toward optimized precision medicine.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
