

Special Issue

Nanobiomaterials with Antimicrobial and Anticancer Applications

Message from the Guest Editors

Nanobiomaterials are nanoscale biomaterials that can be either natural or synthetic and interact with biological systems to perform a specific function.

Nanobiomaterials can serve as an integral part of devices intended to sense a biological response, to deliver a drug in a controlled manner or to direct a specific physiological function. Nanobiomaterials are materials with typical size features in the lower nanometer size range and characteristic mesoscopic properties, for example, quantum size effects. These properties make them attractive objects of fundamental research and potential new applications.

Nanobiomaterials also include inorganic materials functionalized with ligands, biomaterials, and biomolecules. This Special Issue focuses on Nanobiomaterials with Antimicrobial and Anticancer Applications. The interdisciplinary aspect of this Special Issue means it is open to all aspects of nanomaterial- and biomaterial-related research.

Guest Editors

Dr. Saurabh Pathak

Department of Materials Science and Engineering, Seoul National University, Seoul, Republic of Korea

Dr. Rajni Verma

Nanospin Laboratory, Research Institute of Advanced Materials, Department of Materials Science and Engineering, Seoul National University, Seoul 151-744, Republic of Korea

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLUS / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
