Molecular Research on Human Immunodeficiency Virus (HIV)

Message from the Guest Editor

It has been four decades since HIV/AIDS was first clinically detected in 1981 in the United States. Despite effective antiretroviral medication and advanced schedules and regimens, lack of an effective vaccine makes HIV/AIDS still a major public health problem globally. Our progress in understanding human diseases and molecular biology in general have substantially improved due to many extraordinary discoveries and numerous studies on retroviruses. In this special issue, we invite researchers to submit original and review articles on key differences between these viruses with respect to molecular mechanisms, diversification, and their potential effect on pathogenicity. In addition, we would also consider topics such as HIV-1, HIV-2, and HTLV-1 gene expression and regulation, genetic diversity, and molecular determinants of mutagenesis.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
