Molecular Research and Treatment of Pediatric Dermatology

Message from the Guest Editor

There is a very close relationship between the skin barrier and the immune system. It is well known that the immune dysregulation of the innate and adaptive immunity may lead to chronic skin disorders which can occur from the first years of life. However, little is currently known about systemic inflammation in recent-onset skin diseases of childhood.

The aim of this Special Issue is to collect emerging research in the field of topical and systemic biomedicines in Pediatric Dermatology. The spectrum of potential studies is very broad, but therapeutic applications for the treatment of immune-mediated pediatric skin diseases are welcomed. In addition, submissions of original research or review articles are welcome, with topics including new compounds and products, intervention in known pathways or the investigation of new ones, identification of new molecular targets, innovative therapies, and new formulations and delivery systems.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPUS / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
