Progress in Neurodevelopmental Disorders Research

Message from the Guest Editor

Neurodevelopmental disorders encompass a broad spectrum of conditions that affect the growth and development of the brain and nervous system, leading to significant impairments in cognitive, behavioral, and social functioning. These disorders, ranging from autism spectrum disorder (ASD) to attention deficit hyperactivity disorder (ADHD) and intellectual disability, impose a heavy burden on individuals, families, and societies worldwide. Despite significant advances in diagnosis and management, the underlying mechanisms and treatment options for neurodevelopmental disorders remain elusive. The Special Issue, entitled "Progress in Neurodevelopmental Disorders Research", will represent a valuable resource for researchers, clinicians, and policymakers interested in advancing the understanding and treatment of these complex and devastating conditions. We hope that the insights and findings presented here will inspire further collaboration and innovation, ultimately leading to better outcomes for individuals with neurodevelopmental disorders.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
