New Advances in Pulmonary Fibrosis

Message from the Guest Editor

This Special Issue aims to bring together cutting-edge research and expert reviews, highlighting the latest progress in pulmonary fibrosis research, from pathobiology, evolving diagnostic methods to innovative therapeutic strategies and personalized medicine approaches to provide a comprehensive overview of the evolving landscape of pulmonary fibrosis and its implications for both clinical practice and translational research.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.
