Nephrotic Syndrome: Pathomechanism, Diagnostics and Novel Treatment Options

Message from the Guest Editor

Nephrotic syndrome (NS) is characterized by massive proteinuria, hypoproteinemia, and edema, and it is divided into steroid-sensitive NS (SSNS) and steroid-resistant NS (SRNS). While SSNS typically presents with minimal change NS, SRNS typically presents with focal segmental glomerulosclerosis (FSGS), which often leads to end-stage kidney failure. About 30% of cases of childhood-onset FSGS have been found to be hereditary FSGS caused by dozens of podocyte-related genes, and about 5-10% of cases of adult-onset FSGS have also been found to be hereditary FSGS. The aim of this Special Issue is to gather original research articles and review articles that focus on NS. Articles focused on genetic forms of kidney disease are especially encouraged.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
