

Special Issue

Aging and Neuroendocrinological Diseases

Message from the Guest Editors

Physiology disbalance and pathogenesis of central nervous system play an important role in the quality of people life and aging. In the last few years epidemiological and clinical studies have identified different metabolic alterations as risks factors to develop neurodegenerative processes. Following this idea diabetes mellitus, obesity and sedentary live seems to play a relevant role at this level. Nevertheless, science studies are limited and the underlying mechanisms for this relationship remain largely unknown (metabolic disorders-neurodegenerative process). This special issue will publish original research articles as well as mini and full reviews, including perspectives in the field on the current understanding of molecular mechanisms involved in pathogenesis of diseases of the Central Nervous System. Manuscripts on the molecular mechanisms, introduction of ideas for new therapies or new techniques for diagnosis and treatment of diseases of the central nervous system are welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
